Jason Arbon

Appdiff, Inc.

Jason Arbon is the CEO of Appdiff, which is redefining how enterprises develop, test, and ship mobile apps with zero code and zero setup required. He was formerly the director of engineering and product at Applause.com/uTest.com, where he led product strategy to deliver crowdsourced testing via more than 250,000 community members and created the app store data analytics service. Jason previously held engineering leadership roles at Google and Microsoft and coauthored How Google Tests Software and App Quality: Secrets for Agile App Teams.

My Selenium Tests Aren't Stable!

Tuesday, June 02, 2009

By Simon Stewart

It's a complaint that I've heard too many times to ignore: "My Selenium tests are unstable!" The tests are flaky. Sometimes they work, sometimes they don't. How deeply, deeply frustrating! After the tests have been like this for a while, people start to ignore them, meaning all the hard work and potential value that they could offer a team in catching bugs and regressions is lost. It's a shameful waste, but it doesn't have to be.

Automation breaks just when you need it.

STAR EAST A TECHWELL EVENT #STAREAST #AI @jarbon @testdotai

Why AI?

People can deal with change and the unexpected.

Test code can't.

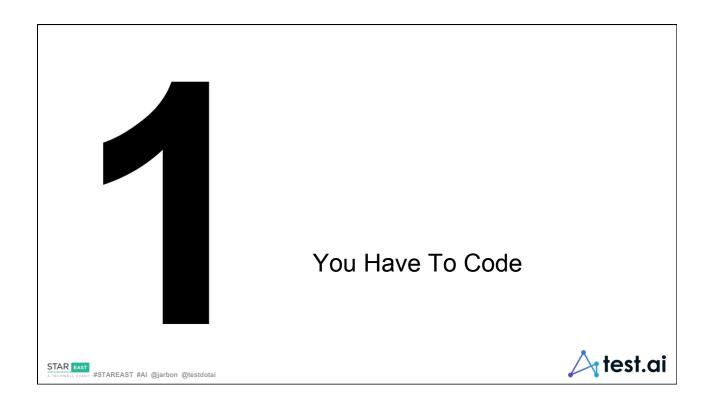

How does AI fix all this?

Al works like People

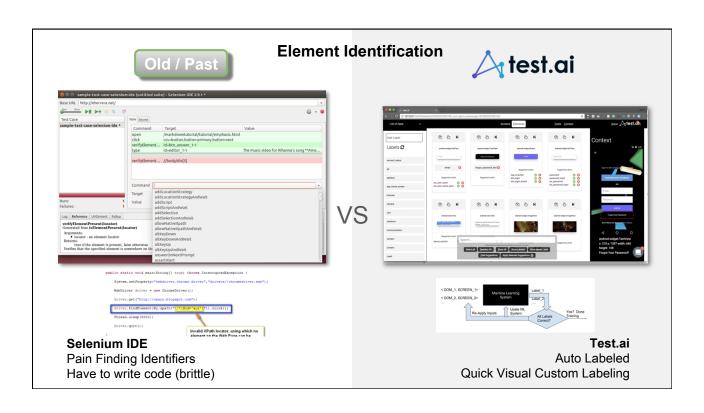

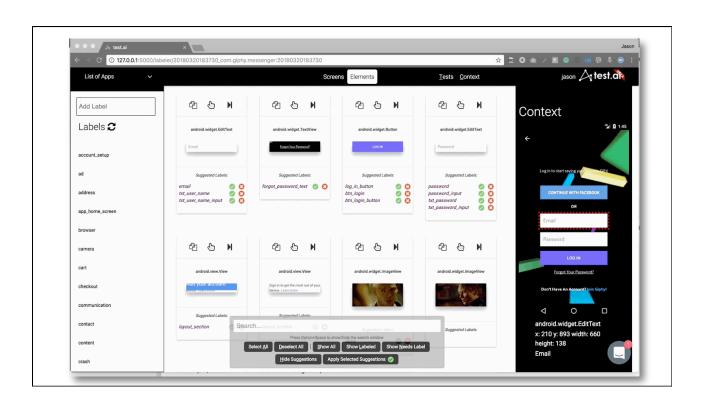

Use Machine Learning to smartly update/repair Selectors when they break.

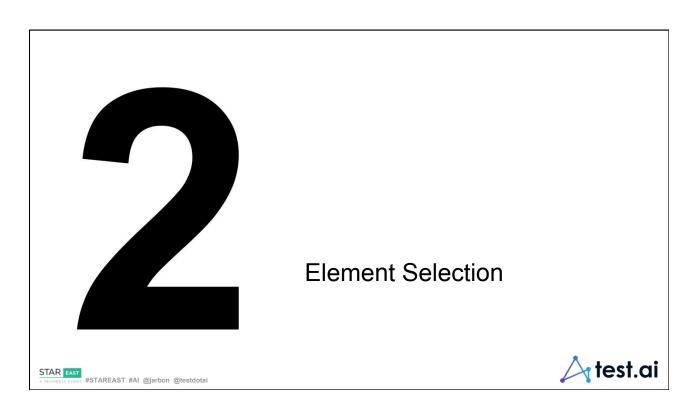

Approach #2

Use Machine Learning directly instead of Selectors.

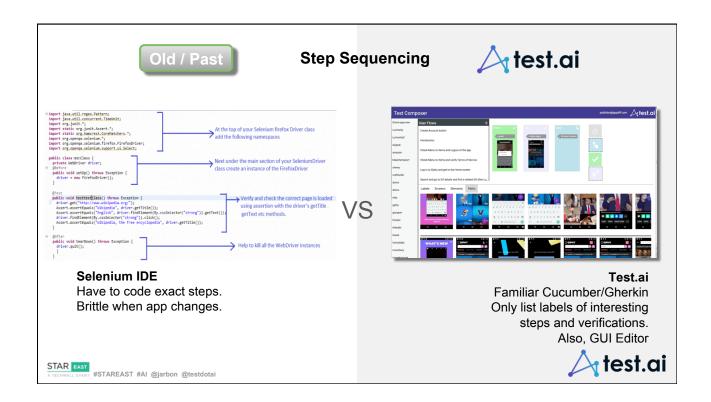

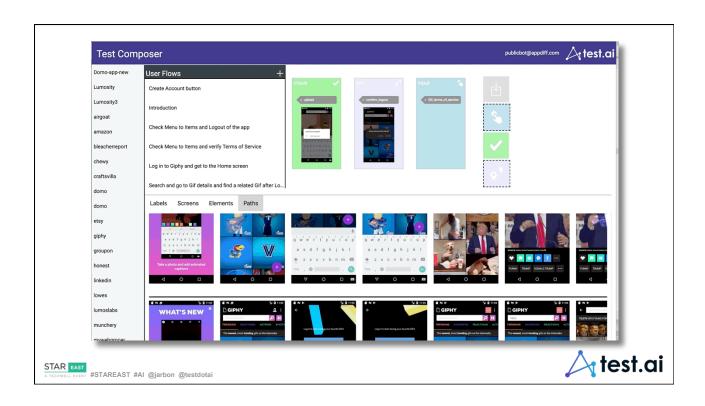

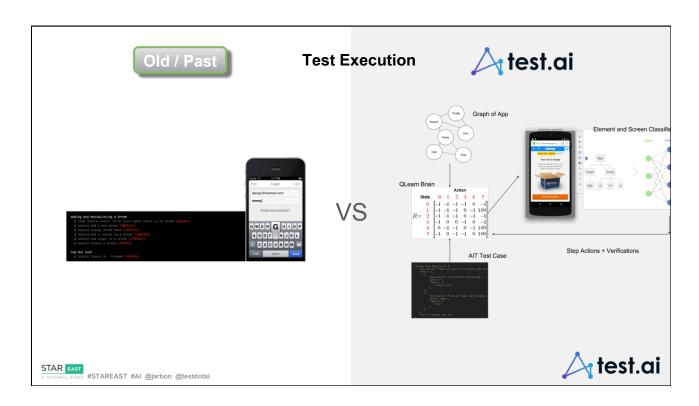

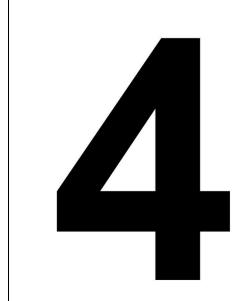

Hard-Coded Step Sequencing

Little Reuse
